

# The Silicates: In Chemistry and Commerce, Including the Exposition of a Hexite and Pentite Theory and of a Stereo-Chemical Theory of General Application (Classic Reprint) (Paperback)

Filesize: 8.94 MB

## Reviews

*This publication is wonderful. It is amongst the most remarkable pdf i have got read. Its been written in an exceptionally basic way and it is merely after i finished reading through this pdf in which really transformed me, alter the way i really believe.*

*(Shayne Schneider)*

## THE SILICATES: IN CHEMISTRY AND COMMERCE, INCLUDING THE EXPOSITION OF A HEXITE AND PENTITE THEORY AND OF A STEREO-CHEMICAL THEORY OF GENERAL APPLICATION (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from The Silicates: In Chemistry and Commerce, Including the Exposition of a Hexite and Pentite Theory and of a Stereo-Chemical Theory of General Application In the year 1903, Faculty of Philosophy in the University of Gottingen proposed the following thesis in connection with the Benek Bequest: A critical examination, based on experimental evidence, is to be made of such chemical compounds as cannot be satisfactorily explained by the usual means. This examination should also take into special consideration the extent to which the introduction of molecular additions is of importance in the formation of such compounds, and whether it is possible to devise a complete systematic arrangement of such compounds. The solution of the problem was admittedly incomplete, inasmuch as only a single branch of the subject - the silicates - was taken into consideration. For this reason the Faculty did not grant the first prize to this thesis, but readily granted the second prize in recognition of fruitful labours leading to a single theory covering a very important group of complex compounds. In this way an established theory - the Hexite-Pentite Theory - was devised for one highly important group of complex compounds - the silicates. With this theory in mind, it was only natural to apply it to a series of silicates of technical and commercial value, such as the ultramarines, Portland, slag, dental and other siliceous cements, glass, glazes, porcelain, etc., in order, if possible, to elucidate their constitution. This has been effected since the original thesis was first written, and the results are published in the following pages. Commencing with the assumption that Nature has formed all substances in accordance with monistic...
