Original publisher: Aberdeen Proving Ground, MD : Army Research Laboratory, 2010 OCLC Number: (OCoLC)227945483 Subject: Programming languages (Electronic computers) Excerpt: . . . cation statements were developed with the goal that each communication statement should have a unique representation that reflects its semantics. Lastly, the control flow edges of the MPI-CFG are annotated with a value that reflects static information about the number, and possibly the process identifiers (if available) of the processes that could execute along that edge. The value will be one of the following four: (I) c , indicating the known process id c of the only process that will execute that edge, (2) single , indicating that statically one can prove that only a single process will execute this edge, but one cannot determine the process id, (3) unknown , indicating that it could be one or more processes executing. this edge, Or (4) multiple , indicating that definitely more than one process will execute this code if there is more than one executing process. A predicate annotation (e. g. ,...
